READY FOR THE INFRASTRUCTURE OF THE FUTURE

EBERO FAB - KNOWLEDGE. ABILITY. DELIVER.

EBERO FAB

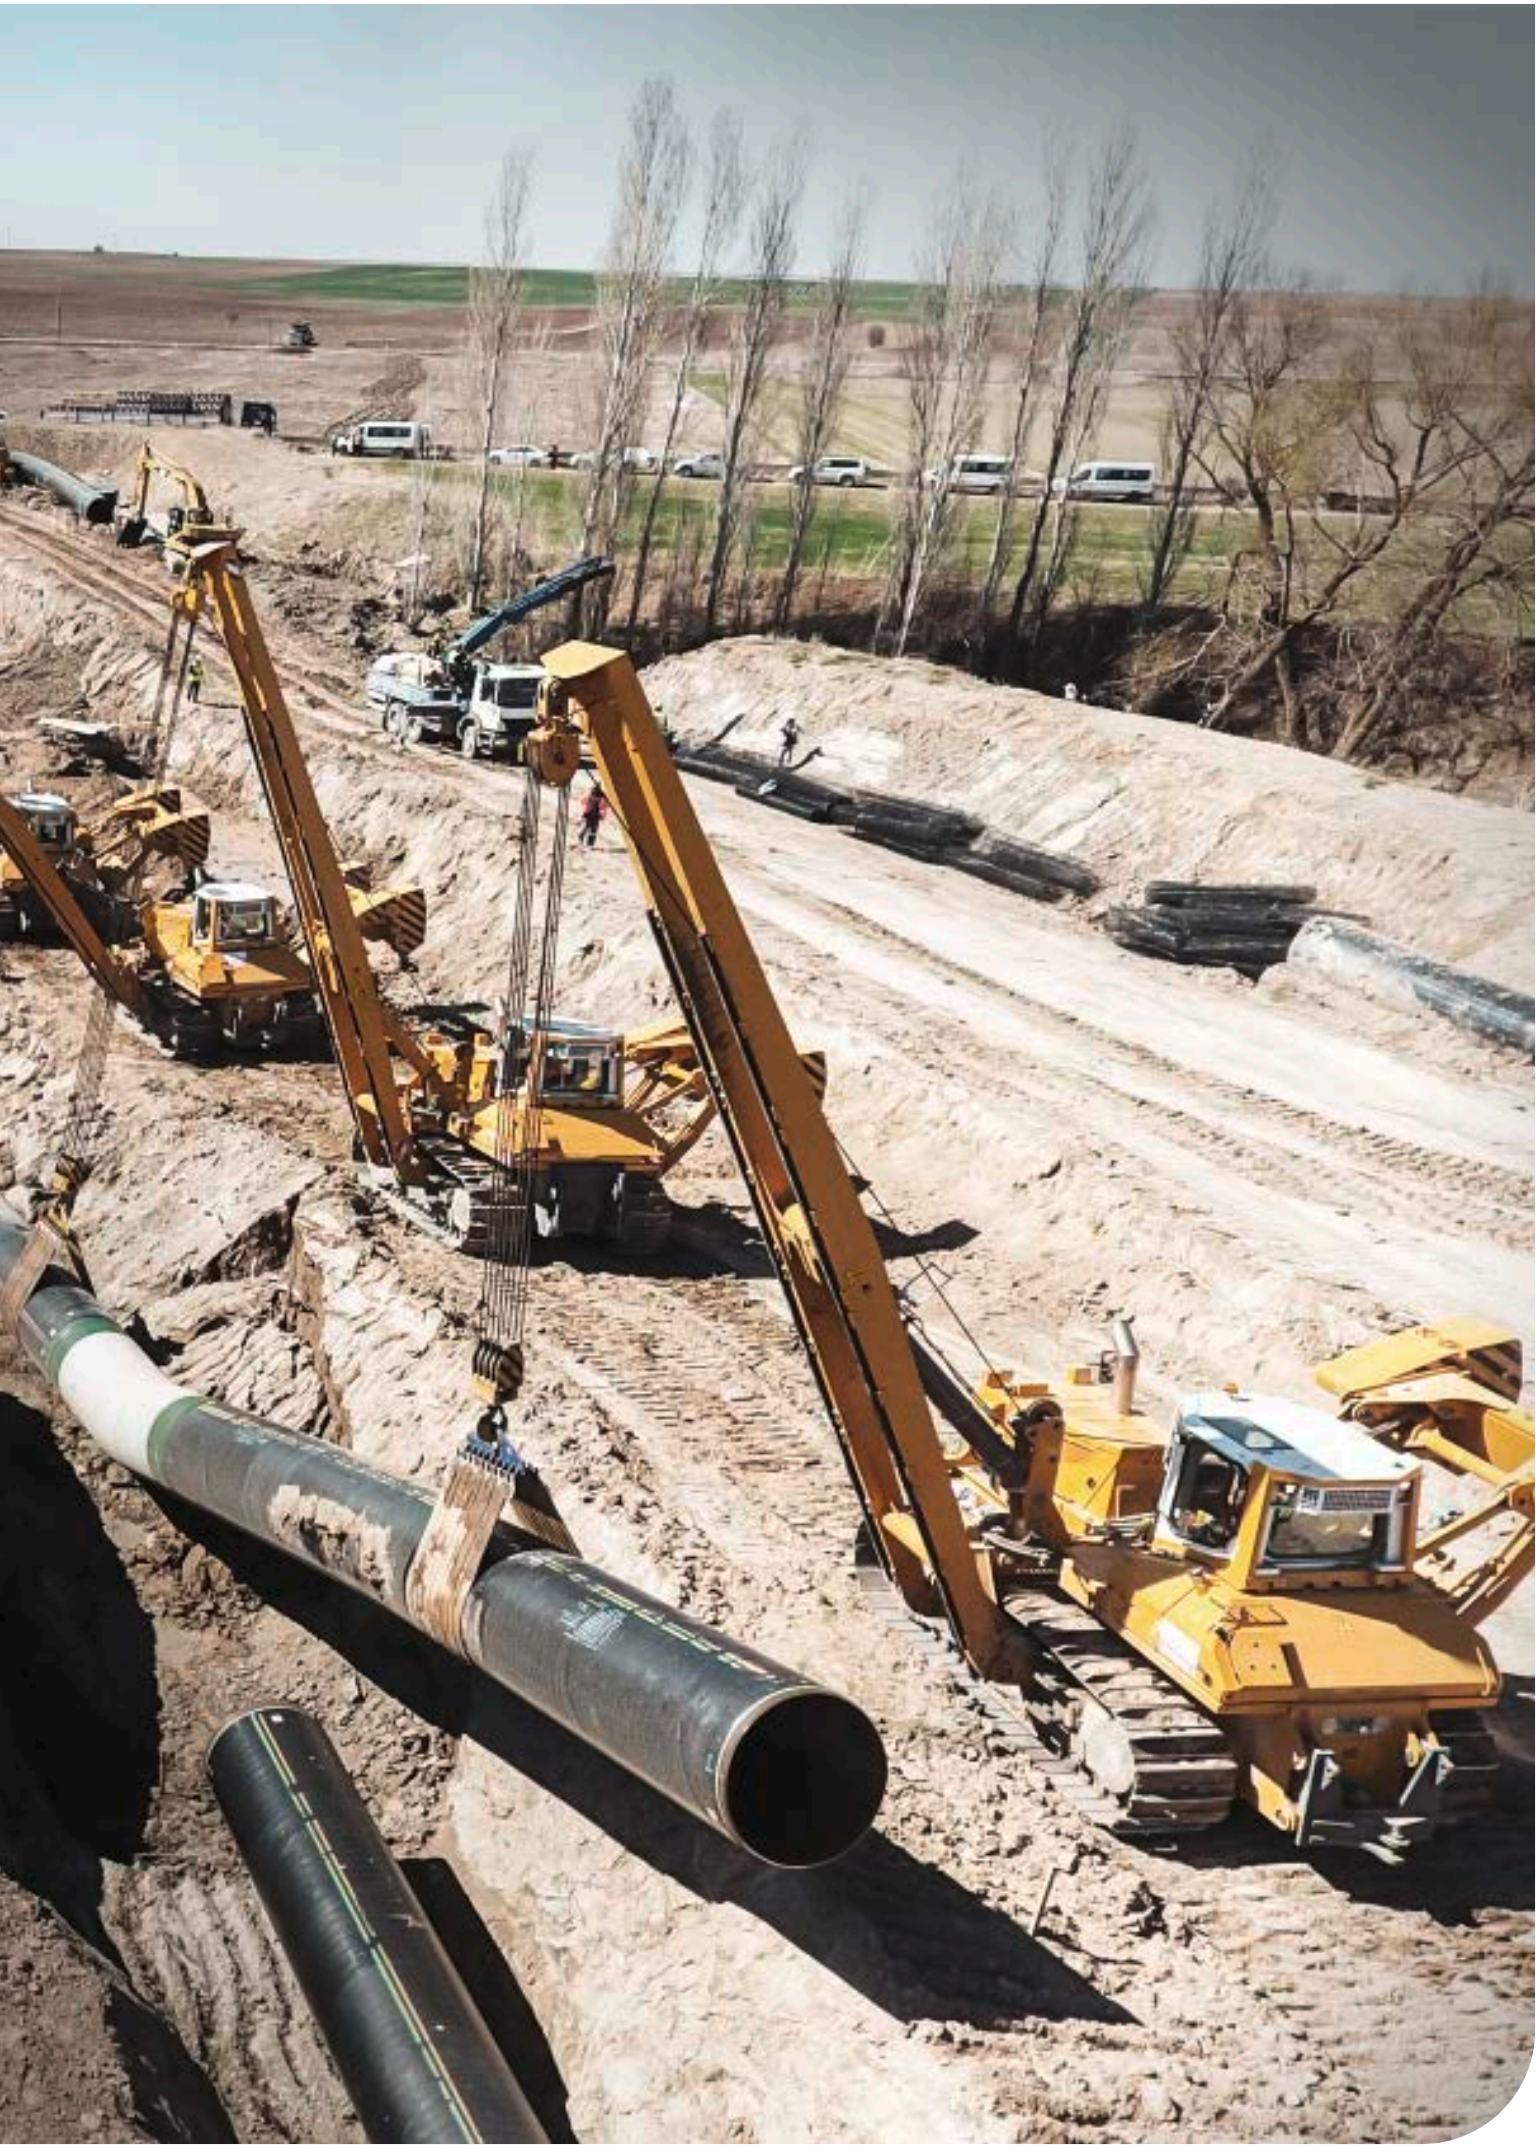
EXCELLENT BELOW GROUND. **A STRONG PARTNER ABOVE GROUND.**

EBERO FAB is the infrastructure expert operating throughout Germany. We get our customers prepared for the infrastructure of the future - from the supply of energy and drinking water to broadband expansion and Smart Cities. Tell us what we can do for you.

With EBERO FAB, customer's benefit from a central partner on board for the entire product supply in the area of technical infrastructure: Advice from proven experts in the various infrastructure sectors. Quality products from all leading manufacturers - many of which are innovations exclusive to us. Sophisticated logistics concepts and complete project management. As well as excellent service throughout Germany.
Our motto: Knowledge. Ability. Deliver.

Infrastructure experts for almost 100 years

EBERO FAB is part of a strong, owner-managed family business with almost 100 years of experience in trade and logistics for technical infrastructure.



THOSE WHO BUILD DEEP **SHOULD SET HIGH STANDARDS**

EBERO FAB offers a comprehensive product portfolio of all leading brand manufacturers. Hardly anywhere else will you find a product range of this breadth and depth with product innovations in all areas, many of which are exclusive to us.

Drinking water

Supply security for your drinking water supply projects:
Ensure perfect water quality and critical infrastructure with EBERO FAB as your partner for product supply and project management. We support you in detecting water losses, remedying them quickly and thereby also reducing energy consumption. As a first mover, we already offer pioneering products that allow you to check the quality, temperature and pressure of drinking water centrally and seamlessly from the waterworks to the house connection.

Energy

Modern supply for gas, electricity, local and district heating expansion:
As a committed partner, we support you in the implementation, expansion and maintenance of your energy networks for supply and industry just as we do in securing the critical infrastructure in accordance with all legal requirements. We provide you with everything you need for highly efficient local/district heating expansion and future-proof H_2-ready gas supply. With in-depth knowledge of the concerns of the industry and intensive advice.

Broadband expansion

The complete broadband infrastructure on the product side from a single source:
Fibre optic technology, FTTx, PoP stations, planning assistance, rollout logistics, supplemented by expert knowledge at all network levels. We know where the pitfalls lurk and help you plan for the right products. This means we can do more for your broadband projects than any manufacturer.

Smart City

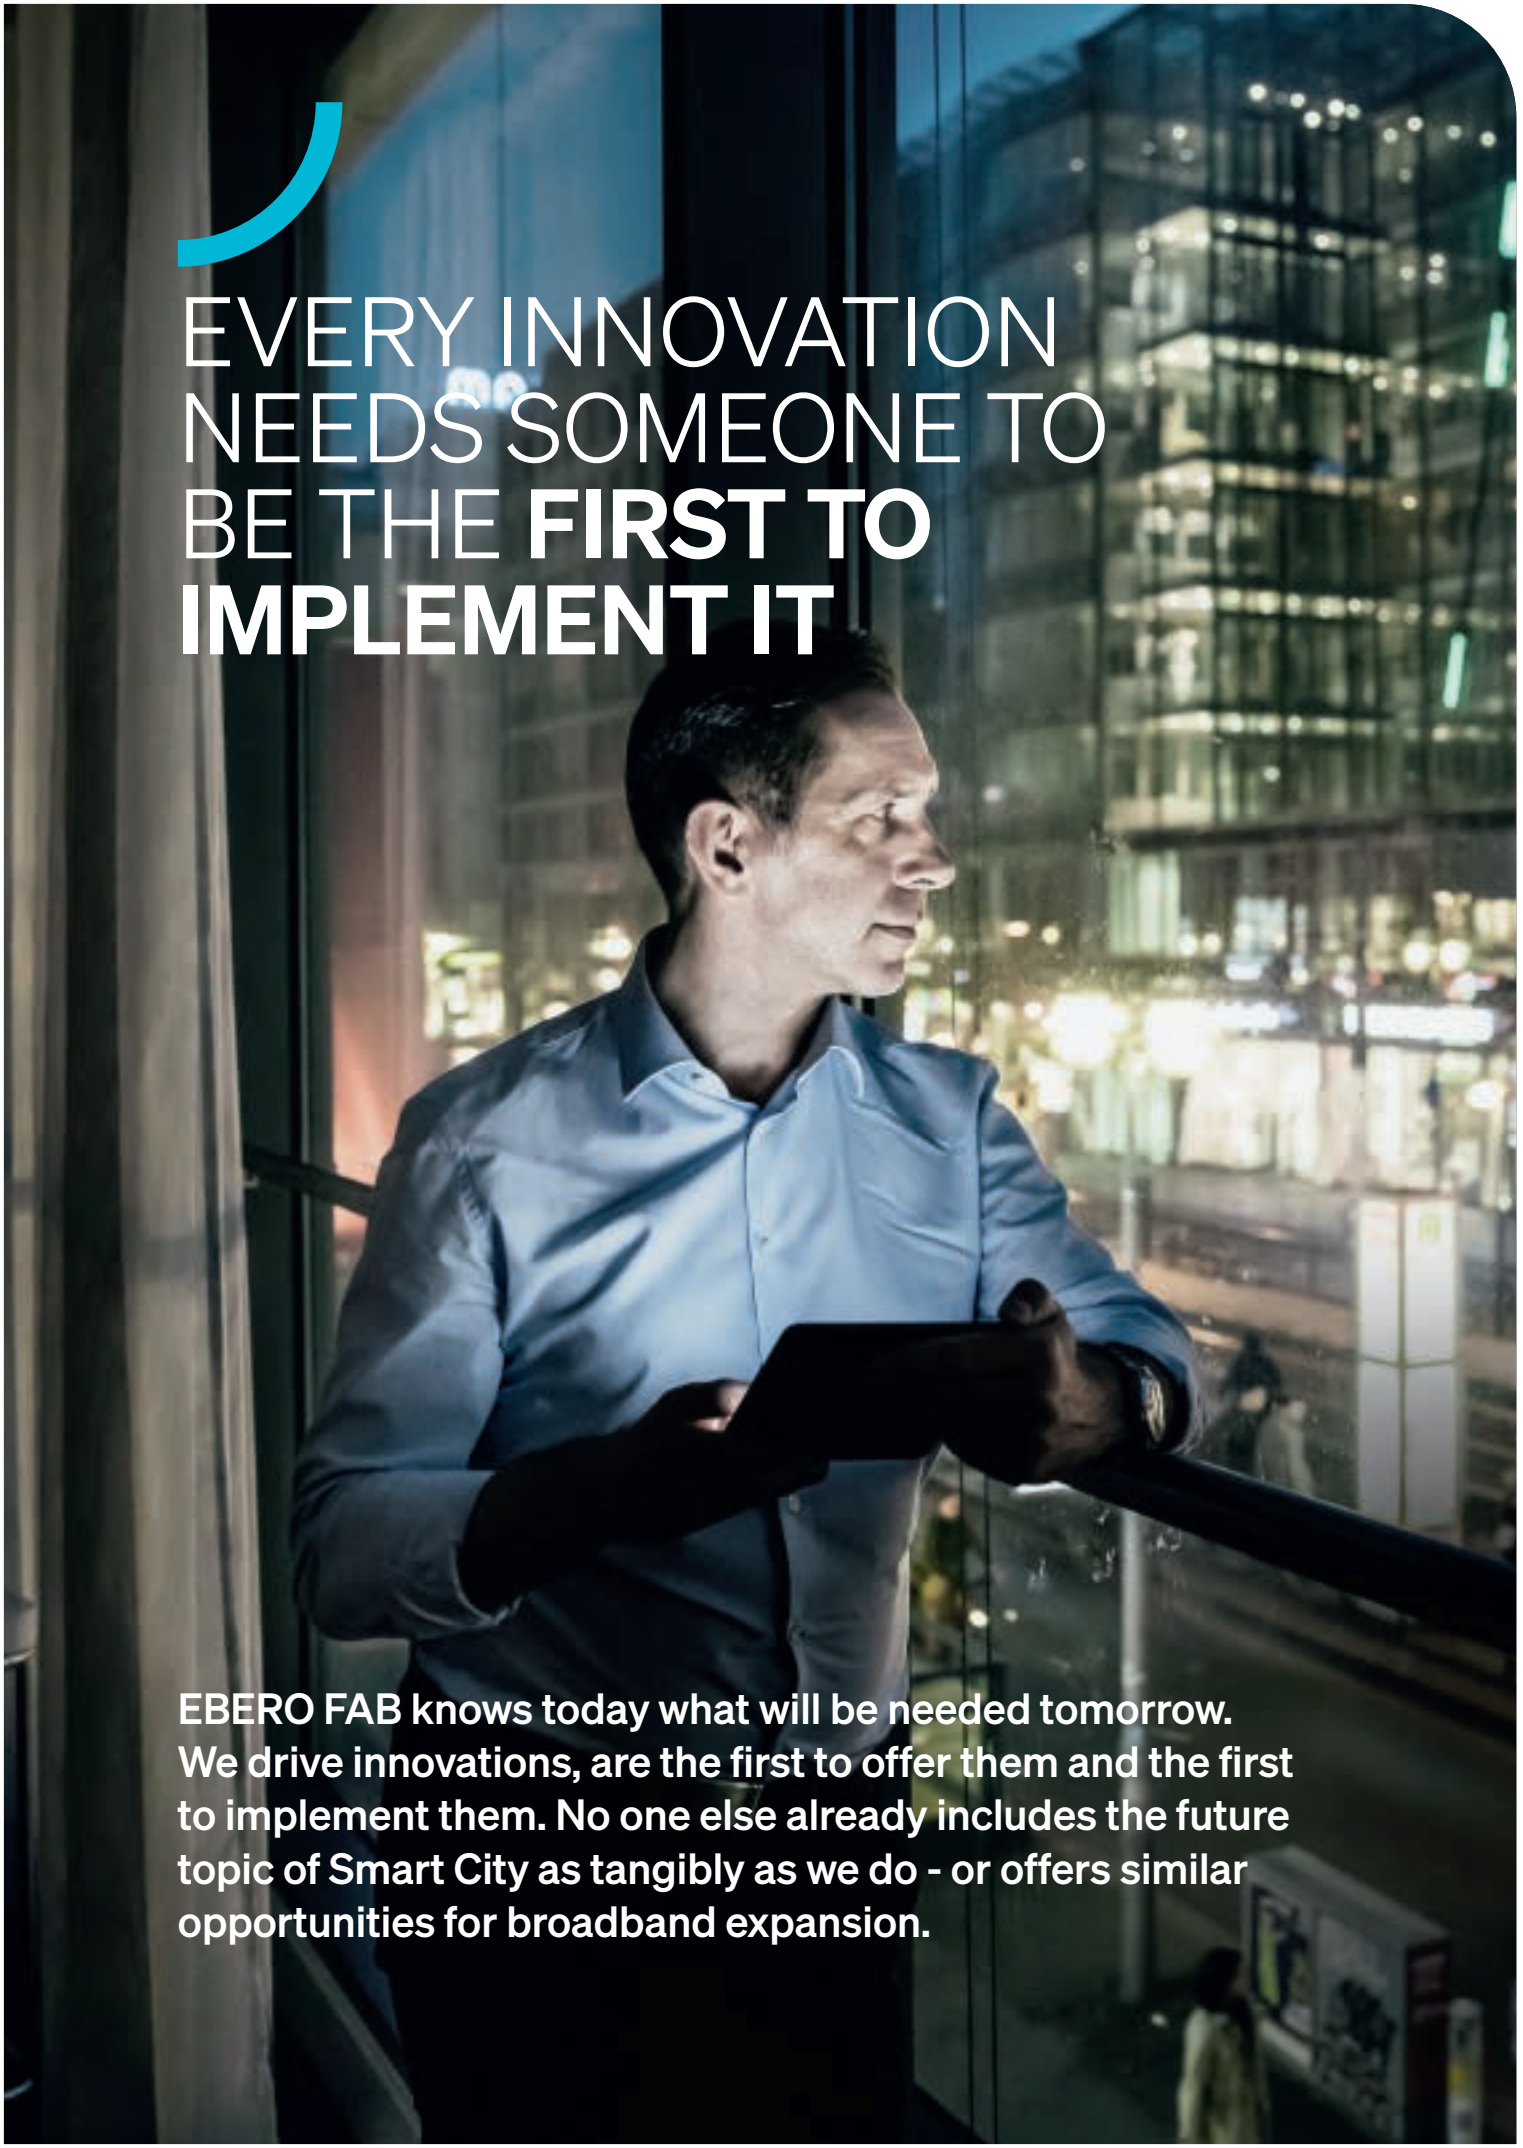
We make your entry into the Smart City easy:
No other supplier in the industry already has Smart City as tangibly on offer as EBERO FAB. We offer innovative product solutions for public Wi-Fi and 5G, digital information services, intelligent traffic control, smart parking, modern charging infrastructure and needs-based lighting management. We have a profound understanding of the topic, innovative forward thinking - and show how best to tap into the potential.

Disposal

A full product range with fast, reliable availability:
At the EBERO FAB sites in Güstrow and Edewecht, we have all the products you need for disposal on hand. Pipe systems, fittings, valves, domestic installation material, manholes and extensive accessories in a quality that knows no compromise - always with personal advice.

Industry

We have the technical expertise you need for industrial infrastructure:
We also think in very large dimensions. EBERO FAB is your flexible, high-performance partner who stands out as a comprehensive supplier with a wide-ranging standard delivery programme for high-quality piping systems made of adhesive and weldable plastics or steel. With smooth logistics, maximum reliability and FM approval where required.



EVERY INNOVATION NEEDS SOMEONE TO BE THE **FIRST TO IMPLEMENT IT**

EBERO FAB knows today what will be needed tomorrow. We drive innovations, are the first to offer them and the first to implement them. No one else already includes the future topic of Smart City as tangibly as we do - or offers similar opportunities for broadband expansion.

EBERO FAB INNOVATION EXAMPLE

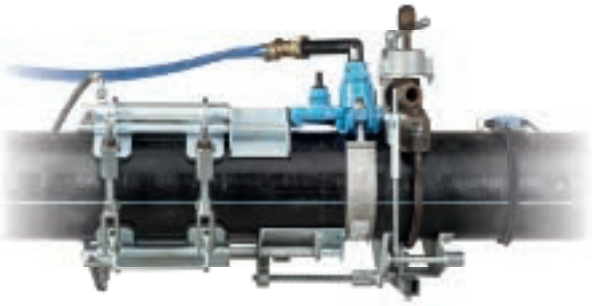
SMART STREET LIGHT

Together with the manufacturer energiedata 4.0, EBERO FAB markets the smart LED street light ED4. It combines a modern "Light-on-demand" lighting management system with a wide range of options for the fast and comprehensive implementation of a future-proof digitalisation infrastructure. Create a central basis for the realisation of your smart city concepts.

EBERO FAB INNOVATION EXAMPLE

SAFE MACHINE CONTROL UP TO 2 KM AWAY

With MoleEye by EBERO FAB, you bring your construction site communication into the 21st century and ensure significantly more safety at the end of the drilling channel in the simplest way possible. Including construction site Wi-Fi as a smart plug-and-play solution. Typical EBERO FAB.



EBERO FAB INNOVATION EXAMPLE

FITTINGS CHANGE AT FULL WATER PRESSURE - IN 2 SECONDS

The fittings changer by our partner ArmEx Solutions saves 8 to 10 m3 of drinking water per replaced fitting and thus saves resources, the environment and the climate. It can be installed faster than any other without shutting off the drinking water supply. The ideal solution for businesses, private households and sensitive infrastructure, such as in doctors' surgeries, hospitals or schools. Fast, safe, cost-saving.

EBERO FAB INNOVATION EXAMPLE

MORE CLIMATE PROTECTION THROUGH HIGHLY EFFICIENT EE-HEATING NETWORKS

Heat pumps and heat grids are the central building blocks of a climate-neutral heat supply, which must become reality by 2045 at the latest. As a polymer specialist with many years of experience, our partner Rehau already offers a pipe system with up to 70% longer service life - heat supply for generations.

DIRECT ACCESS TO OVER 150,000 ARTICLES **AROUND THE CLOCK**

In the EBERO FAB webshop, you can order a wide range of quality products from our premium partners, such as pipes, fittings, valves, moulded parts, manholes and house connection accessories, around the clock, 365 days a year. With all important product details, prices and availability information at a glance. Plus over 3,000 product catalogues as well as instructions, brochures, manuals and price lists. It's worth registering.

E-business solutions by EBERO FAB
On request, we can configure an e-business connection individually tailored to your projects, allowing you to easily call up any product relevant to your projects 365/7/24. With simple, efficient search, own favourites list, flip catalogue and precise technical information on each article. In addition, you benefit from individual conditions and current offers. Fully digital and mobile. This can be based on our own OCI-enabled web shop, one of our digital catalogues in your own e-procurement platform or any digital marketplace.

ONLY A WORKING CONSTRUCTION SITE **IS A GOOD CONSTRUCTION SITE**

Planning and implementing infrastructure projects is above all a battle against uncertainties. When it comes to the availability of the material, what matters is not only the highest reliability, but also the greatest possible flexibility and the ability to react quickly. With EBERO FAB Logistics Services, you can react to anything that may come up on the construction site. Without standstill. Without material jam.

EBERO FAB's range of services includes the entire range of process-optimised logistics for all areas of technical infrastructure in individually adapted models. We organise incident management or C-parts storage for you throughout Germany and ensure immediate access to all defined parts at all times with never-out-of-stock service.

We can set up a complete IT-supported warehouse management system for you internally or externally and, if you wish, we can also take over the entire project and manufacturer logistics. We check every item twice before it is dispatched and rely greatly on the dedication and sense of responsibility of our own drivers. So that your projects run smoothly.

WE THINK TO THE LAST GASKET

EBERO FAB does more than trade. We know the details of demanding infrastructure projects in all areas of application, responds and looks ahead. With in-depth advice from our experts, we actively help utility companies, municipalities, industrial companies, pipeline and plant constructors to bring their infrastructure projects to a smooth conclusion. Let us support you with comprehensive services. Committed, solution-oriented, reliable.

EBERO FAB rental service
To enable you to operate flexibly, we can supply special tools and machines on a rental basis directly to the construction site on a weekly or daily basis. From butt and electrofusion machines to round press clamps, scraping tools and rotary scapers to topload tools, UIS Power Push, pressing tools for fittings and slurry pumps. Everything that moves your project forward.

EBERO FAB training courses and certifications
In free online seminars, we regularly share our knowledge on hot topics relating to the various areas of grid-connected infrastructure measures. With further training and certifications such as the acquisition of the press certificate or SKZ training for PE welding, we help your team to gain further qualifications.

FUTURE STARTS BELOW GROUND

We work in an industry with great responsibility for the future. That's why sustainable thinking in all areas and respectful handling of all resources are an integral part of the EBERO FAB principle. This ranges from consistent material reduction and maximum recycling of packaging to the use of green electricity at all locations. At the same time, we promote e-mobility in our own fleet and among our customers. Because the resources of the planet are limited.

We help to shape the future. For EBERO FAB, sustainability means taking responsibility that goes beyond our day-to-day business.
We develop new processes, review supply chains for environmental compatibility, and support long-term projects that make our operations and products even more sustainable. In this way, we drive continuous improvement—for a future we consciously shape.

WE SUPPORT
UN GLOBAL COMPACT

Since 2022, EBERO AG has been committed to the UN Global Compact Initiative for Corporate Responsibility and its principles in the areas of human rights, labour, the environment and anti-corruption.

A STRONG TEAM
THROUGHOUT GERMANY

From over 10 locations in Germany, we supply you with everything you need for your pipeline infrastructure projects. Behind this is a dedicated team in all areas. We are a large family with flat hierarchies, where everyone is given responsibility and enjoys trust. With flexible working hours, mobile working and varied tasks, we support our employees wherever possible. Our goal: That everyone likes to come to work. You'll feel that.

„Many colleagues have been with us for 10, 20 or even 30 years. We're proud of that."

Roman Baumhof

„There's always a lot going on at EBERO FAB - no year without something new. We're always on the move, always dynamic. Downtime is our antithesis."

Antje Winands

When should we start?

Lay the foundation for successful projects with us.
We look forward to the challenge.
